## WATERWORKS OPERATOR CERTIFICATION PROGRAM SELF-PACED STUDY APPROVED COURSES Revised May 2023

Operators enrolling in any approved distance education course must follow the Department of Health's (DOH) <u>Self-Paced Study Approval and Examination Procedure</u>. To ensure that the Self-Paced Study course you are taking will be accepted toward the waterworks professional growth requirement in Washington, contact us at 253-288-3357 for approval prior to enrolling in any type of self-paced study course.

The Department requires that certain approved Self-Paced Study courses, where successful completion is determined by passing an examination, have a monitored, closed book examination. Monitored exam requirements are indicated on the list of approved courses. Both the examination monitor and the student must submit a signed declaration affirming that all examinations have been completed in accordance with this procedure. A copy of the procedure and required forms are available online at <a href="https://www.wacertservices.org">www.wacertservices.org</a>.

The Self-Paced Study courses listed on the following page are the only courses that have been evaluated and meet DOH criteria for waterworks operator education and professional growth requirements. Continuing Education Units (CEU) accepted for successful completion of each course is listed. You must contact the sponsor directly for order and enrollment information.

REMEMBER - CEU accepted for some courses in Washington may be different than the CEU awarded by the sponsor.

## **COLLEGE COURSES**

Self-Paced Study that is offered for college credit through an accredited college or university and meets the established professional growth relevancy criteria may also be approved. Please review the <u>Self-Paced Study</u> <u>Approval and Examination Procedure</u> for more information about completing a relevant course for college credit.
